# IGNITE 26

# Inspiring Growth | New Ideas | Talent Explored

Finding the joy in learning something new is a life-long skill. The IGNITE programme offers students an opportunity to reset what learning can mean. It is an opportunity for students to gain key skills such as communication, independence and curiosity.

This year we have programmed the week to encourage students to explore new activities as well develop their passion projects. The activities will help staff and students to grow new ways of working and encourage a team approach to learning, as well as offer students the opportunity to explore their future pathways.

By providing more places than are needed across the packages we hope all students have the opportunity to find something that they enjoy, however this does mean if there are aren't enough students signed up to a particular package, it may not be able to go ahead. In this instance an alternative package will be offered.

Selection will be on a first come, first served basis, but students need to recognise that good and respectful behaviour is paramount for trips and activities to run safely, therefore this has to be taken into consideration when staff decide on attendance.
