

# How to plan and prepare for KS4 Geography

In Geography, we **Upload, Process** and **Download** our way to successful grades, just like in all other subjects.

These listed strategies are supported by educational research, and are designed to enable you to engage with activities which result in successful outcomes.

1

- Make a glossary of key terms using your knowledge organiser..
- Draw out key diagrams for example of plate boundaries or how landforms are formed.
- Create flash cards of your case studies and examples.
- Using your knowledge organiser and exercise book, reduce topics into the most important points and create mind maps.

2

- After you have produced your glossary of key words test yourself (or a friend).
- Look, cover and draw your diagrams until you remember them.
- Explain a topic in your own words.
- Use your flash cards to get someone to test you on your case study knowledge.
- Color code impacts- social, economic and environmental.
- Redraw your mind maps from memory.

3

- Complete a Seneca assignment on your topic to test yourself.
- Teach someone else the topic.
- Complete an exam question.
- Improve your answer using the mark scheme or examiners report.
- Complete a quiz on BBC bitesize.
- Rag rate what you need to revise further from your quizzes/exam questions.
