

How to plan and prepare for KS4 IT

In IT, we **Upload**, **Process** and **Download** our way to successful grades, just like in all other subjects.

These listed strategies are supported by educational research, and are designed to enable you to engage with activities which result in successful outcomes.

1

Look, cover, write, check

1. Open your Knowledge Organiser for a specific topic and read it carefully
2. After reading, cover or turn over the page and get some blank paper
3. Write down as much information from memory as you can, focusing on keywords
4. Check your notes against your Knowledge Organiser, make corrections and add information

2

Mindmap

1. Create a mindmap of the key information you can remember from your Knowledge Organiser without looking
2. Use your Knowledge Organiser to add any information you have missed in a different colour

3

Questions

1. Use practice questions provided on teams to see how much you can remember
2. Use your Knowledge organiser to mark them and make corrections
